Free Energy Tips

The tips listed below don't cost a thing and can potentially save you 10-25 percent on your monthly energy bill.

- Barbecue outdoors when practical, keeping in mind the heat and effect of sun on your body. Reducing the heat coming into your home from any source, such as cooking, will reduce the load on your air conditioning.

- Use pool trippers to reduce the time your swimming pool pump runs—eight to twelve hours a day is plenty.
- If your A/C unit is on the ground, keep the area around it clean and free of obstructions to maintain air flow.
- Unplug your televisions/VCR when you're on vacation. Most new sets draw power even when they're turned off.
- In warm months, set the thermostat to 78-80 degrees when home and 5 to 10 degrees warmer at night or when you're not home.

Call Before You Dig

Call 811 before you dig. It's the law. The depth of utility lines varies and there may be multiple utility lines in a common area. Call two days in advance of digging and a representative will send out someone to mark underground facilities.

Know what's below.
Call before you dig.

Third Party Notifications

To help prevent disconnects due to misplaced or forgotten electric bills, NV Energy offers a third-party notification service. We notify the party you indicate (a friend, relative or agency) when your electric service may be in jeopardy because of an unpaid bill. Call customer service at the number listed on the back for assistance.

Maximize Your Pool Pump Energy Savings

A single-speed pool pump is typically your home's second largest energy consumer, behind your air conditioning system. Replacing a single-speed pump with a variable-speed pump could save you up to 80 percent in energy costs associated with your pool.*

Variable-speed pumps run cooler, quieter and more efficiently. NV Energy is offering customers a rebate on the purchase of a new variable-speed pump. Customers will also receive a free pump calibration to ensure that you are maximizing the energy savings from your new pump. Ask your pool service professional or visit a participating pool retailer for advice on which pump is right for your pool.

For more information about pool pump rebates, pump calibrations, and a list of participating retailers and pool builders, visit

**For southern Nevada customers only.*

Comfort Savings Program

NV Energy offers home weatherization services to our customers with qualifying incomes. These services help owners and renters who struggle with monthly expenses gain greater financial freedom by helping them significantly reduce utility costs. Our trained professionals help customers understand their energy use and choose the most cost-effective measures that result in the greatest energy savings. For more information on this free home weatherization program or to confirm eligibility, call toll free at 1-866-920-7822.

Don't Overload Outlets

Do not put too many plugs in an outlet. When younger children are in your home make sure all unused electric outlets have safety caps. Do not put anything in electric outlets except safety caps or plugs.

Our offices will be closed on Monday, July 5, in observance of Independence Day.
