Dear County Employee,

My name is David O. Carpenter, M.D., I am a Harvard Medical School public health research physician, who became the founding Dean of the School of Public Health at the University at Albany. Since 2001, I have been the Director of the Institute for Health and the Environment, University at Albany, NY. The Institute was named a Collaborating Center of the World Health Organization in 2011. Co-editor of the BiInitiative Report 'A Rationale for a Biologically-based Exposure Standard for Electromagnetic Radiation.' I am an expert witness primarily on Electro Magnetic Frequency/Radio Frequency (EMF/RF).

We are doing a research project on how many Clark County employees are being exposed to EMF from the County's implementation of 5G/MW Towers on their properties, which they are collecting a rental fee.

The firefighters main organization is trying to keep these towers from their stations.
<https://www.iaff.org/cell-tower-radiation/>

I have attached a full listing of every property that the county owns, in the event that you happen to work in a building they own, but aren't paid by the county.

These towers appear as 'trees', with various size 'containers/boxes/antennas' attached to them, some with what looks like a 'loud speaker' attachment.

Please forward this to all of your fellow workers, we believe that there are numerous employees who are being harmed by these towers. We believe that medical professionals who aren't educated on the effects of EMF upon health are misdiagnosing them.

This is a worldwide problem that is increasing exponentially on a daily basis.

Please fill out the attached form and return to me at DavidOCarpenter.MD@Stop5GUSA.Xyz

Very truly yours,

David O. Carpenter, M.D.
