Sec. Kennedy, Invitation for Panel Discussion On RF & Wearables.

Since its establishment in 1998, the National Toxic Encephalopathy Foundation (NTEF), a 501c3, non-profit organization, has focused on medical and environmental issues. The NTEF has been a strong advocate for raising awareness about the health risks linked to endogenous environmental exposures, including chemicals, Electro-magnetic Radiation (EMF) (5G, smart meters, WiFi, etc.), Radio Frequency Radiation (RF).

We are formally inviting you Secretary Kennedy to participate in a Wearables Panel Discussion in Las Vegas, Nevada, at a date and time that is convenient for you, we will arrange the venue.

This panel will be comprised of yourself, your experts on 'wearables/RF', along with the NTEF's experts on RF and wearables.

Secretary Kennedy when you were confirmed, the NTEF was overwhelmed with joy. Your perspectives on health were in harmony with ours. We subscribed to the Children's Health Defense (CHD) Foundation's daily newsletters and podcasts, as the information provided was both factual and essential. Especially since one of our expert advisors, David O. Carpenter, MD, did a few podcasts with you.

Secretary Kennedy during your confirmation hearing, you stated, '*that WiFi causes cancer, alters DNA, and leads to neurological issues*'. [1]
